

Juan Pablo Gonzalez Bendana

8126 Laughing Falcon Trail, Conroe, TX 77385 | (832) 813-9290 | gonzajua1@tamu.edu

Education

Bachelor of Science in Multidisciplinary Engineering Technology

Texas A&M University | August 2023 – December 2027 | College Station, TX

Professional Experience

Intern – Paloma Resources

June 2025 – August 2025 | Houston, TX

- Created a comprehensive map of major U.S. oil & gas plays using Enverus Prism to analyze production, rig count, well counts, and company activity.
- Analyzed gas-to-oil ratio to classify hydrocarbon plays and generated data visualization in Excel.
- Researched SEC 10-K and 10-Q filings to summarize domestic activity of public E&P companies and delivered findings in a PowerPoint presentation for leadership.
- Supported daily operations by updating depth vs days chart for all active drilling rigs.
- Participated in field visits to rigs and production plants, gaining hands-on operational insight.

Student Technician – ETID Department, Texas A&M University

September 2025 – December 2025 | College Station, TX

- Selected to assist in Digital Electronics (ESET 219) Lab portion, supporting students with lab assignments.
- Guide students in programming FPGA boards using Quartus software.
- Provide technical support and troubleshooting for hardware and software issues.

Related Experience

Mechanical Co-Lead – MIRAGE (University Rover Challenge)

August 2024 – January 2026 | SOMTECH at Texas A&M University | College Station, TX

- Delegate tasks and managing project timelines.
- Designed end-effector, rover chassis, and improvements of prior rover iterations.
- Lead in the recruitment of new members every semester.
- Performed Finite Element Analysis (FEA) on CAD designs to validate performance and reliability of parts.

Projects

Robotic End-Effector

Summer 2025

- Designed, 3D printed and assembled an underactuated robotic claw for gripping applications.
- Programmed the end-effector control logic using C++ on an Arduino Uno microcontroller.

Airsoft SSX23/MK23 to M4 Magazine High-Pressure Air Adapter

March 2024 – June 2024

- Engineered an adapter block to allow compatibility of High-Pressure Air and M4 magazines with an airsoft pistol.
- Designed to withstand 130 psi.
- Increased ammo capacity by 250 rounds.
- Enhance reliability and cost effectiveness of pistol usage.

Skills

- Certified SOLIDWORKS Professional in Mechanical Design (August 2022 – Present).
- Proficient in Microsoft 365.
- Fluent in Spanish.

Awards

- FIRST Robotics Creativity Award sponsored by Rockwell Automation
